Islandsbanki

New issuer - Islandsbanki assigned A2 deposit and A3 issuer ratings, outlook stable

Summary

Islandsbanki's (ISB) foreign and local currency banks deposit ratings of A2/Prime-1 and senior unsecured MTN ratings of (P)A3/(P)Prime-1 are driven by the bank's baa2 baseline credit assessment (BCA); and three notches and two notches of rating uplift, respectively, under our forward-looking Advanced Loss Given Failure (LGF) analysis, which takes into accounts the risks faced by the bank's different liabilities should Islandsbanki enter into resolution.

ISB's BCA of baa2 reflects its robust capitalisation, strong credit underwriting, satisfactory core profitability and adequate liquidity, balanced against single name and high geographical concentration and reliance on market funding.

Exhibit 1

Rating Scorecard - Key Financial Factors

These represent our [Banks Methodology](#) scorecard ratios. Asset risk and profitability ratios reflect the weaker of either the latest reported or three-year average ratios. The capital ratio is the latest reported figure. Funding structure and liquid resources ratios reflect latest fiscal year-end figures.

Source: Moody's Financial Metrics

Credit strengths

- » Low levels of non-performing loans and strong underwriting
- » Strong capitalisation supported by high capital requirements and good recurring profitability
- » Good and stable profitability supported by tight cost control
- » Adequate liquidity buffers

Credit challenges

- » Geographical and single-name concentrations result in tail risks in the loan book
- » Reliance on market funding, with an increasing amount of FX debt, exposes the bank to changes in investor sentiment

Rating outlook

The stable outlook on ISB's long-term deposit ratings reflects the bank's resilient performance in terms of asset quality metrics and overall risk profile, and the agency's expectation that this performance will continue in the next 12-18 months.

Factors that could lead to an upgrade

- » Upward rating pressure could develop if ISB improves its risk profile by reducing single name and sector concentrations in combination with a reduction in the use of market funds while maintaining strong capitalisation and strong earnings' generation capacity across the credit cycle, without an increase in its risk profile.
- » Upward rating pressure could also develop because of a larger cushion of loss absorbing obligations protecting creditors and depositors in case of failure.

Factors that could lead to a downgrade

- » Downward pressure could emerge if ISB's (1) asset quality and risk profile was to deteriorate, for example as a result of increased exposures to more volatile sectors and/or increased single name concentrations; (2) risk profile increases more than the agency anticipates, driven by non-credit related risks such as market risk and fx risk (3) financing conditions were to become more difficult or (4) the macroeconomic environment deteriorates significantly leading to a lower Macro Profile.
- » Furthermore, a reduction in the rating uplift as a result of our LGF analysis triggered by structural funding changes to the bank's balance sheet could lead to downward rating pressure.

Profile

Islandsbanki is an Icelandic bank founded in 1875, and offers retail, private banking, asset management, corporate and investment banking services. The bank, then under the name Glitnir, defaulted in 2008, following which the bank was reorganized as Islandsbanki with the Icelandic government assuming a position as the largest owner. The government's ownership stake was 42.5% as of 2Q 2023.

The bank had around 30% market share in Iceland as March 2023, and operates through 12 branches, as well as a full-service digital and mobile app offering.

Detailed credit considerations

ISB's operations are supported by its "Strong-" weighted macro profile

ISB operates mostly in Iceland, with a small legacy international exposure in the Arctic region amounting to less than 1% of the group's assets. This is reflected in ISB's assigned Weighted Macro Profile of 'Strong –'. Iceland's 'Strong –' Macro Profile balances the country's small size and associated history of economic boom and bust episodes with relatively high wealth levels, competitiveness and favorable demographics. Iceland further benefits from high institutional and government strength, combined with a low susceptibility to political event risk.

Iceland's growth is volatile, reflecting the economy's limited diversification and relative openness, which increases its vulnerability to sector-specific and external shocks. The economy has weathered the twin shocks of the pandemic and the war in Ukraine, helped by a strong policy response and Iceland's energy independence. Diversification efforts are showing the first signs of success in some sectors, which should strengthen the economy's resilience to shocks.

We expect real GDP growth to remain robust in 2023 at 4%, supported by strong tourism demand. Real GDP grew at a very strong annual rate of 6.1% in the first quarter of 2023 but we expect growth to slow in the remainder of the year because of tighter monetary and fiscal policies. Domestic payment card turnover suggests that domestic demand has started to soften as high inflation weighs on household purchasing power. However, elevated nominal wage growth and a strong labor market will support consumption.

The main risks to the banking sector stem from the country's small size and limited economic diversification, which could create a risk of contagion in the event of sector specific shocks. Icelandic banks also make extensive use of market funding.

Strong underwriting supports improving asset quality but geographical and single name concentrations weigh on risk profile

ISB's asset quality has continuously improved with a reported non-performing loans (NPL) ratio, measured as stage 3 loans to gross loans, at 1.75% at end of June 2023, from its peak of 3% in 2019, while the ratio remained at 2.9% during 2020 despite the coronavirus outbreak. ISB's declining NPL ratio is reflective of the improved economic conditions in the Icelandic market as a whole and the recovery in the tourism sector.

Stage 2 loans have also improved significantly from their peak of 15.6% of gross loans in 2020 and reached 2.6% of gross loans in June 2023, as recoveries in the tourism sector continues. Going forward, we expect stage 2 loans to increase slightly from low levels, as the current operating environment continues to weigh on import-dependent companies.

Exhibit 3

Islandsbanki's asset quality has improved in recent years

Note: coverage ratio measured as loan loss reserves / non-performing loans.

Source: Company reports

ISB's loan portfolio is evenly split between corporate and retail exposures, with corporate exposures currently accounting for 53% of the loan book as of end-June 2023. The retail portfolio consists mostly of retail mortgages, of which 42% was in the form of CPI-linked loans at end 2022 as non-indexed mortgages remained the most popular product. However, as rates increased, and households' debt servicing ability faltered, there has been a trend reversal towards CPI-linked mortgages. During the first six months of 2023, Islandsbanki's stock of CPI-linked mortgages grew by 13.1%, while the stock of non-indexed mortgages decreased by 4.7% (see Exhibit 5).

The performance of the retail loans has been strong, despite the 8.5% cumulative increase in the Central bank's key rate since Q2 2021 in an aim to control inflation. This is explained by the relatively small share of non-CPI linked floating rate mortgages (26% of retail loans at end June 2023) and the fact that the majority of the fixed rate non-CPI linked mortgages are due to re-price at the higher rates in 2024 and 2025. In addition households have the ability to transfer their non-CPI linked mortgage to a CPI linked product where monthly payments are significantly lower. Nevertheless, Iceland benefits from strong employment and real wage growth which we expect to continue to support the performance of the retail book.

Exhibit 4

ISB's mortgages are mostly in the form of non-CPI linked products

Source: Company reports

The bank's corporate book is focused on real estate and construction, commerce and services and the seafood sector. The historically volatile real estate and construction sectors accounted for 16.8% of gross loans as of June 2023. During 2023, The corporate loan book also contains some client concentrations, with contagion risks between various sectors given the high degree of interconnectedness and small size of the economy, as evidenced during the Covid-19 pandemic when severe impacts in the tourism sector resulted in issues in the broader economy.

Exhibit 5

ISB's corporate book benefits from a diverse mix across different sectors

Source: Company reports

The bank's appetite for market risk is low, with small market making and proprietary trading activities, which is reflected in the bank's market risk add-on in their Pillar 2 capital requirements.

Our assigned score also takes into consideration ISB's track record of strong underwriting, counterbalanced by its geographical and sector concentrations and its high share of corporate lending. We expect ISB's asset quality metrics to deteriorate only marginally from current levels, as more small to medium-sized enterprises (SMEs) experience repayment difficulties, outweighing continued recoveries on loans related to the tourism sector and some of the bank's legacy loans.

Capitalisation is expected to remain strong albeit at lower levels

ISB enjoys a strong capital position as well as a very strong leverage ratio, reflective of the use of the standardised method for calculation of capital requirements. The bank's reported common equity Tier 1 (CET1) ratio was 20.0% at end June 2023, compared to a capital requirement of 15.2%. The bank further had a total capital adequacy ratio (CAR) of 23.2% at end-June 2023 compared to a minimum required CAR of 19.7%.

The bank's CET1 requirement are expected to increase to 15.7% in March 2024, when the countercyclical buffer increases to 2.5% from 2% currently, combined with the bank's new Pillar 2 (P2R) requirement of 2.4% (2.6% previously) as communicated by the FSA in the latest Supervisory Review and Evaluation Process (SREP) report. ISB has historically been benefiting from the lower P2R requirement compared to its peers mainly driven by a lower add-on for market risk, reflective of the banks limited appetite for market making activities.

The strong capitalisation is further supported by a strong leverage ratio of 12.8% as of end-June 2023, which is significantly above the European average ratio of around 5%.

Exhibit 6

ISB benefits from a strong capital position

Source: Company reports

The bank is targeting a buffer of 100bps-300bps above regulatory requirements, implying a CET1 target level of 16.2%-18.2% and considers an optimal CET1 capital at 17.2%, which is below its latest reported figures. We expect the bank's ISK5 billion share buyback plan, combined with its 50% dividend payout ratio, to contribute to a capital optimization over the coming 12-18 months.

Our assigned capital score reflects ISB's strong capital position, strong leverage ratio and its access to equity capital markets as well as our expectation that the bank will continue to optimize its capital base by reducing its CET1 levels.

High reliance on net interest and fee income results in good recurring profitability supported by higher rates environment

ISB's core profitability is good and stable. The bank reported return on assets (RoA) of 1.55% at end June 2023 and 1.56% in 2022 significantly improved from 0.9% in 2018 and 0.7% in 2019 as the bank increased its focus on pricing and cost control. Net interest income is the main source of income and accounts for almost 77% of operating income, while fees account for the remaining 22% reflective of the banks strong position in the asset management segment. The bank's profitability has benefited greatly from the increasing interest rates and strong credit growth in the past two years, while limited investment banking operations have resulted in increased earnings stability compared to peers, due to limited contribution of NFI to its core profits. We expect profitability to moderate slightly going forward due to increased funding cost and normalisation of cost of risk but to remain strong overall.

Exhibit 7

ISB has maintained strong recurring profitability supported by higher rates

Source: Company reports

ISB's net interest income increased by 27% in 2022, supported by higher rates and strong credit growth. The key interest rate increased to 9.25% on 23 August 2023, following thirteen consecutive rate hikes since the ultralow rate level of 0.75% seen in the first half of 2021. The net interest margin continued expanding to 3.2% in the first six months of 2023, compared to 2.9% in 2022 and 2.4% in 2021, driven by increasing deposit margins. We expect net interest margin to remain broadly stable as further benefits from interest rate increases will be offset by increased funding costs and lower credit growth.

ISB's net fee and commission income (NFCI) benefits from a good degree of diversification. Payment and processing fees remain the dominate income driver followed by personal and corporate investment banking and asset management fees. Although ISB does not have an in-house insurance operation, but owns 100% of the share capital of Allianz Iceland which is in a strategic partnership with Allianz Global, and has positively impacted the bank's NFCI.

In the first half of 2023, NFCI increased by 8.7% YoY, mainly driven by a 29.7% increase in card and payment processing as the economic recovery and increasing tourism positively impacted transaction levels. However, investment banking and brokerage income fell by 8.8% for the same period, while asset management decreased by 6.4%, as capital markets continued to exhibit signs of increasing stress.

ISB benefits from good cost control which compares favorably to domestic peers. The bank targets a cost-to-income (C/I) of 45% and is already within target in June 2023 with a reported 42.3%. However, overall expenses increased to ISK14.6 billion in the first six months of 2023, compared to ISK11.8 billion for the same period in 2022, largely due to wage increases in response to the high level of inflation, as well as investments in IT and strategic projects. We expect the bank's C/I ratio remain within target going forward, despite elevated wage growth, as investment in the business are expected to result in increased revenues and long-term efficiency gains.

Our assigned score reflects our expectation that the bank's profitability will remain strong but moderate slightly from current levels, due to increased funding costs and normalization of cost of risk.

Reliance on market funding balanced against adequate liquidity

ISB's liability structure consisted of 59.3% deposits as of end of June 2023, in line with the average level of 59.9% for the period 2018-2022, showcasing both a resilient core deposit base, as well as the ability for the bank to grow its deposits in line with asset growth. Almost 46% of deposits are being covered by the deposit guarantee scheme but only 11% of deposits being term deposits with 3 months or more until maturity. Nevertheless, we consider ISB's deposit base as stable due to the closed nature of the Icelandic banking sector, with no international banks offering banking services in ISK.

The bank's market funding consists of covered bonds as well as senior unsecured debt, both issued in both domestic and foreign currencies (see Exhibit 9). Senior debt accounts for 40% of debt outstanding, and is mostly issued in foreign currency which provides access to a wider investor base. However, high reliance in foreign investors also exposes the bank to changes in investor sentiment in times of market stress.

Covered bonds account for around 60% of market funding, which we consider a more stable source of funding, and is primarily issued in local currency. In 2022, the bank started also issuing in the international markets, which although it provides diversification in its investor base it also increases somewhat the FX risk due to the absence of international counterparties to provide currency swaps for these issuances. FX debt issuances broadly match FX lending needs as well as the bank's FX assets held in the liquidity portfolio, and the net position is closely monitored and managed to zero.

Exhibit 8

Islandsbanki has a diverse mix of market funding Breakdown of market funding as of June 2023

Source: Company reports

Our assigned market funding score reflects our view that the bank's use of market funds will remain broadly unchanged in the coming years implying a market funds to TBAs ratio of approximately 22%. The score also incorporates our view that ISB's stable and sticky deposit base, combined with the bank's refinancing strategy and good market access in the vast domestic market somewhat offsets risks related to changes in investor sentiments particularly in the international capital markets.

ISB benefits from adequate liquidity, with liquid assets accounting for 21.1% of tangible banking assets in December 2022. The bank benefits from a very strong Basel III LCR ratio of 259% in June 2023, consisting of LCR for FX of 260% and LCR for ISK of 145%, well above the regulator's minimum requirements of total LCR and LCR in FX of 100% and a minimum LCR ISK of 50%. The liquidity pool of assets consists mostly of cash and deposits with the central bank and government bonds.

Source of facts and figures cited in this report

Unless noted otherwise, we have sourced data relating to systemwide trends and market shares from the central bank. Bank-specific figures originate from banks' reports and Moody's Banking Financial Metrics. All figures are based on our own chart of accounts and may be adjusted for analytical purposes. Please refer to the document [Financial Statement Adjustments in the Analysis of Financial Institutions](#), published on 9 August 2018.

ESG considerations

Islandsbanki's ESG Credit Impact Score is Moderately Negative CIS-3

Exhibit 9

ESG Credit Impact Score

CIS-3

Moderately Negative

For an issuer scored CIS-3 (Moderately Negative), its ESG attributes are overall considered as having a limited impact on the current rating, with greater potential for future negative impact over time. The negative influence of the overall ESG attributes on the rating is more pronounced compared to an issuer scored CIS-2.

Source: Moody's Investors Service

Islandsbanki's **CIS-3** indicates that ESG considerations have a limited impact on the current rating with the potential for downward rating pressure from moderate governance risks. These reflect the need to address and improve the bank's compliance and control frameworks, following shortcomings identified in relation to the partial disposal of the Icelandic government's stake in 2022.

Exhibit 10

ESG Issuer Profile Scores

ENVIRONMENTAL

E-3

Moderately Negative

SOCIAL

S-4

Highly Negative

GOVERNANCE

G-3

Moderately Negative

Source: Moody's Investors Service

Environmental

Islandsbanki faces moderate environmental risks primarily because of its portfolio exposure to carbon transition risk as a diversified bank. In line with its peers, the bank is exposed to mounting business risks and stakeholder pressure to meet broader carbon transition goals. Consequently, ISB is actively engaging in optimizing its loan portfolio longer-term toward less carbon intensive assets.

Social

Islandsbanki is exposed to high industrywide social risks particularly related to customer relations risk and associated regulatory and litigation risks, requiring high compliance standards. These risks are mitigated by the bank's developed policies and procedures. High cyber and personal data risks are mitigated by technology solutions and organisational measures to prevent data breaches. ISB benefits from Iceland's more favourable demographic profile, relative to many other countries, which affords business opportunities for the bank.

Governance

ISB faces moderate governance risks. While its risk management is in line with best practices, some policies and procedures in respect to the partial government share sale in March 2022 were considered not sufficient by the Central Bank's financial supervision authority, leading to unforeseen senior management turnover. Nevertheless, the bank has taken necessary actions to address the identified weaknesses and continues to improve its compliance framework, while management credibility is expected to be restored over time. ISB is partly owned by the Government of Iceland, which is considered a passive shareholder, but this does not result in incremental governance risks because of the country's developed institutional framework.

ESG Issuer Profile Scores and Credit Impact Scores for the rated entity/transaction are available on Moodys.com. In order to view the latest scores, please click [here](#) to go to the landing page for the entity/transaction on MDC and view the ESG Scores section.

Support and structural considerations

Loss Given Failure (LGF) analysis

The European Union's BRRD has been transposed into Icelandic law, applicable from 1 September 2020, which confirmed our current assumptions regarding the LGF analysis. We assume a residual tangible common equity of 3% and post-failure losses of 8% of tangible banking assets, a 25% run-off in junior wholesale deposits, a 5% run-off in preferred deposits, in line with our standard assumptions.

The Icelandic legislation has established full depositor preference over senior unsecured creditors. Therefore, we assign a 100% probability to deposits being preferred to senior unsecured debt.

For Islandsbanki's short-term and long-term deposit ratings and issuer ratings we have considered the likely impact on loss given failure from the combination of their own volume and the amount of debt subordinated to them. This results:

» for the deposit ratings in a Preliminary Rating Assessment of A2/Prime-1, three notches above the BCA, reflecting an extremely low loss given failure.

» for the issuer ratings in a Preliminary Rating Assessment of A3, two notches above the BCA, reflecting a very low loss given failure.

Government support considerations

Despite Islandsbanki's significant deposit market share of 30%, and its systemically important status, we assume a low probability of government support for its deposit, CRA, and CRR ratings reflecting Iceland's implementation of the EU's Bank Recovery and Resolution Directive (BRRD) and the country's past track record on providing no support to the financial sector during the 2008 financial crisis.

Counterparty Risk Ratings (CRRs)

Islandsbanki's CRRs are A2/Prime-1

For Islandsbanki, the preliminary CR Assessment is three notches above the entity's baa2 Adjusted BCA, reflecting the buffer against default provided to more junior obligations represented by the CR Assessment. To determine the CR Assessment, we focus purely on subordination, taking no account of the volume of the instrument class. Finally, the bank's CR Assessment does not benefit from any government support uplift.

Counterparty Risk (CR) Assessment

Islandsbanki's CR Assessment is A2(cr)/Prime-1(cr)

The CRR, before government support, is three notches above the Adjusted BCA of baa2, reflecting a moderate loss given failure from the volume of instruments that will be subordinated to CRR liabilities. Further, Islandsbanki's CRR does not benefit from any rating uplift based on government support, in line with our support assumptions.

Methodology and scorecard

About Moody's Bank Scorecard

Our scorecard is designed to capture, express and explain in summary form our Rating Committee's judgement. When read in conjunction with our research, a fulsome presentation of our judgement is expressed. As a result, the output of our scorecard may materially differ from that suggested by raw data alone (though it has been calibrated to avoid the frequent need for strong divergence). The scorecard output and the individual scores are discussed in rating committees and may be adjusted up or down to reflect conditions specific to each rated entity.

CREDIT RATINGS DO NOT ADDRESS ANY OTHER RISK, INCLUDING BUT NOT LIMITED TO: LIQUIDITY RISK, MARKET VALUE RISK, OR PRICE VOLATILITY. CREDIT RATINGS, NON-CREDIT ASSESSMENTS ("ASSESSMENTS"), AND OTHER OPINIONS INCLUDED IN MOODY'S PUBLICATIONS ARE NOT STATEMENTS OF CURRENT OR HISTORICAL FACT. MOODY'S PUBLICATIONS MAY ALSO INCLUDE QUANTITATIVE MODEL-BASED ESTIMATES OF CREDIT RISK AND RELATED OPINIONS OR COMMENTARY PUBLISHED BY MOODY'S ANALYTICS, INC. AND/OR ITS AFFILIATES. MOODY'S CREDIT RATINGS, ASSESSMENTS, OTHER OPINIONS AND PUBLICATIONS DO NOT CONSTITUTE OR PROVIDE INVESTMENT OR FINANCIAL ADVICE, AND MOODY'S CREDIT RATINGS, ASSESSMENTS, OTHER OPINIONS AND PUBLICATIONS ARE NOT AND DO NOT PROVIDE RECOMMENDATIONS TO PURCHASE, SELL, OR HOLD PARTICULAR SECURITIES. MOODY'S CREDIT RATINGS, ASSESSMENTS, OTHER OPINIONS AND PUBLICATIONS DO NOT COMMENT ON THE SUITABILITY OF AN INVESTMENT FOR ANY PARTICULAR INVESTOR. MOODY'S ISSUES ITS CREDIT RATINGS, ASSESSMENTS AND OTHER OPINIONS AND PUBLISHES ITS PUBLICATIONS WITH THE EXPECTATION AND UNDERSTANDING THAT EACH INVESTOR WILL, WITH DUE CARE, MAKE ITS OWN STUDY AND EVALUATION OF EACH SECURITY THAT IS UNDER CONSIDERATION FOR PURCHASE, HOLDING, OR SALE.

MOODY'S CREDIT RATINGS, ASSESSMENTS, OTHER OPINIONS, AND PUBLICATIONS ARE NOT INTENDED FOR USE BY RETAIL INVESTORS AND IT WOULD BE RECKLESS AND INAPPROPRIATE FOR RETAIL INVESTORS TO USE MOODY'S CREDIT RATINGS, ASSESSMENTS, OTHER OPINIONS OR PUBLICATIONS WHEN MAKING AN INVESTMENT DECISION. IF IN DOUBT YOU SHOULD CONTACT YOUR FINANCIAL OR OTHER PROFESSIONAL ADVISER.

ALL INFORMATION CONTAINED HEREIN IS PROTECTED BY LAW, INCLUDING BUT NOT LIMITED TO, COPYRIGHT LAW, AND NONE OF SUCH INFORMATION MAY BE COPIED OR OTHERWISE REPRODUCED, REPACKAGED, FURTHER TRANSMITTED, TRANSFERRED, DISSEMINATED, REDISTRIBUTED OR RESOLD, OR STORED FOR SUBSEQUENT USE FOR ANY SUCH PURPOSE, IN WHOLE OR IN PART, IN ANY FORM OR MANNER OR BY ANY MEANS WHATSOEVER, BY ANY PERSON WITHOUT MOODY'S PRIOR WRITTEN CONSENT.

MOODY'S CREDIT RATINGS, ASSESSMENTS, OTHER OPINIONS AND PUBLICATIONS ARE NOT INTENDED FOR USE BY ANY PERSON AS A BENCHMARK AS THAT TERM IS DEFINED FOR REGULATORY PURPOSES AND MUST NOT BE USED IN ANY WAY THAT COULD RESULT IN THEM BEING CONSIDERED A BENCHMARK.

All information contained herein is obtained by MOODY'S from sources believed by it to be accurate and reliable. Because of the possibility of human or mechanical error as well as other factors, however, all information contained herein is provided "AS IS" without warranty of any kind. MOODY'S adopts all necessary measures so that the information it uses in assigning a credit rating is of sufficient quality and from sources MOODY'S considers to be reliable including, when appropriate, independent third-party sources. However, MOODY'S is not an auditor and cannot in every instance independently verify or validate information received in the credit rating process or in preparing its Publications.

To the extent permitted by law, MOODY'S and its directors, officers, employees, agents, representatives, licensors and suppliers disclaim liability to any person or entity for any indirect, special, consequential, or incidental losses or damages whatsoever arising from or in connection with the information contained herein or the use of or inability to use any such information, even if MOODY'S or any of its directors, officers, employees, agents, representatives, licensors or suppliers is advised in advance of the possibility of such losses or damages, including but not limited to: (a) any loss of present or prospective profits or (b) any loss or damage arising where the relevant financial instrument is not the subject of a particular credit rating assigned by MOODY'S.

To the extent permitted by law, MOODY'S and its directors, officers, employees, agents, representatives, licensors and suppliers disclaim liability for any direct or compensatory losses or damages caused to any person or entity, including but not limited to by any negligence (but excluding fraud, willful misconduct or any other type of liability that, for the avoidance of doubt, by law cannot be excluded) on the part of, or any contingency within or beyond the control of, MOODY'S or any of its directors, officers, employees, agents, representatives, licensors or suppliers, arising from or in connection with the information contained herein or the use of or inability to use any such information.

NO WARRANTY, EXPRESS OR IMPLIED, AS TO THE ACCURACY, TIMELINESS, COMPLETENESS, MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE OF ANY CREDIT RATING, ASSESSMENT, OTHER OPINION OR INFORMATION IS GIVEN OR MADE BY MOODY'S IN ANY FORM OR MANNER WHATSOEVER.

Moody's Investors Service, Inc., a wholly-owned credit rating agency subsidiary of Moody's Corporation ("MCO"), hereby discloses that most issuers of debt securities (including corporate and municipal bonds, debentures, notes and commercial paper) and preferred stock rated by Moody's Investors Service, Inc. have, prior to assignment of any credit rating, agreed to pay to Moody's Investors Service, Inc. for credit ratings opinions and services rendered by it fees ranging from \$1,000 to approximately \$5,000,000. MCO and Moody's Investors Service also maintain policies and procedures to address the independence of Moody's Investors Service credit ratings and credit rating processes. Information regarding certain affiliations that may exist between directors of MCO and rated entities, and between entities who hold credit ratings from Moody's Investors Service, Inc. and have also publicly reported to the SEC an ownership interest in MCO of more than 5%, is posted annually at www.moodys.com under the heading "Investor Relations — Corporate Governance — Charter Documents - Director and Shareholder Affiliation Policy."

Additional terms for Australia only: Any publication into Australia of this document is pursuant to the Australian Financial Services License of MOODY'S affiliate, Moody's Investors Service Pty Limited ABN 61 003 399 657 AFSL 336969 and/or Moody's Analytics Australia Pty Ltd ABN 94 105 136 972 AFSL 383569 (as applicable). This document is intended to be provided only to "wholesale clients" within the meaning of section 761G of the Corporations Act 2001. By continuing to access this document from within Australia, you represent to MOODY'S that you are, or are accessing the document as a representative of, a "wholesale client" and that neither you nor the entity you represent will directly or indirectly disseminate this document or its contents to "retail clients" within the meaning of section 761G of the Corporations Act 2001. MOODY'S credit rating is an opinion as to the creditworthiness of a debt obligation of the issuer, not on the equity securities of the issuer or any form of security that is available to retail investors.

Additional terms for Japan only: Moody's Japan K.K. ("MJKK") is a wholly-owned credit rating agency subsidiary of Moody's Group Japan G.K., which is wholly-owned by Moody's Overseas Holdings Inc., a wholly-owned subsidiary of MCO. Moody's SF Japan K.K. ("MSFJ") is a wholly-owned credit rating agency subsidiary of MJKK. MSFJ is not a Nationally Recognized Statistical Rating Organization ("NRSRO"). Therefore, credit ratings assigned by MSFJ are Non-NRSRO Credit Ratings. Non-NRSRO Credit Ratings are assigned by an entity that is not a NRSRO and, consequently, the rated obligation will not qualify for certain types of treatment under U.S. laws. MJKK and MSFJ are credit rating agencies registered with the Japan Financial Services Agency and their registration numbers are FSA Commissioner (Ratings) No. 2 and 3 respectively.

MJKK or MSFJ (as applicable) hereby disclose that most issuers of debt securities (including corporate and municipal bonds, debentures, notes and commercial paper) and preferred stock rated by MJKK or MSFJ (as applicable) have, prior to assignment of any credit rating, agreed to pay to MJKK or MSFJ (as applicable) for credit ratings opinions and services rendered by it fees ranging from JPY100,000 to approximately JPY550,000,000.

MJKK and MSFJ also maintain policies and procedures to address Japanese regulatory requirements.
