# Factsheet

## Our profile

With a history that dates from 1875, Íslandsbanki is an Icelandic universal bank with a strong customer focus. The Bank believes in moving Iceland forward by empowering its customers to succeed - reflecting a commitment to run a solid business that is a force for good in society.

Driven by the ambition to be #1 for service, Íslandsbanki's banking model is led by three business divisions that build and manage relationships with its customers. Íslandsbanki maintains a strong market share with the most efficient branch network in the country, supporting at the same time its customers' move to more digital services.

The Bank operates in a highly attractive market and, with its technically strong foundations and robust balance sheet, is well positioned for the opportunities that lie ahead.

Íslandsbanki has a BBB/A-2 rating from S&P Global Ratings.

## The Bank

**12** branches

**739** number of FTEs at Íslandsbanki at period end

## Market share\*

**32%** retail customers  
**38%** SMEs  
**35%** large companies

## Directors' Report

These are the condensed consolidated interim financial statements for the period 1 January to 31 March 2021 ("the interim financial statements") of Íslandsbanki hf. ("the Bank" or "Íslandsbanki") and its subsidiaries (together referred to as "the Group").

### Operations in the reporting period

Íslandsbanki is a universal bank offering comprehensive financial services to households, corporations, and institutional investors in Iceland. The Group is one of Iceland's largest banking and financial services groups, with a strong domestic market share.

The Group's profit from its operations for the reporting period amounted to ISK 3,615 million. At the end of the reporting period, the Group employed 774 full-time members of staff, including 739 within the Bank itself.

Net interest income decreased by 4.5% between years, as the lower interest rate environment resulted in the net interest margin decreasing from 2.8% to 2.4%. Net fee and commission income increased by 14.9%, well distributed across business segments. Salaries and related expenses were up by 10.1% between years as a result of wage increases in line with the general wage agreements in Iceland, redundancy costs and accrued leave, while other operating expenses decreased by 6.8%. The Bank's cost to income ratio decreased from 62.9% to 52% between years. Net impairments amounted to ISK 518 million and decreased from 3,490 million in the first quarter of 2020, when expected credit losses increased substantially due to the COVID-19 pandemic.

The Group's loan book grew by 2.3% in the period as the demand for new mortgages and refinancing continues at a strong pace. The Bank's ratio of non-performing loans fell from 2.9% to 2.4% as one material exposure was fully repaid. Stage 2 loans under IFRS 9 are however still at 15.6% as the credit risk related to loans to the tourism industry was deemed in 2020 to have materially increased due to the COVID-19 pandemic. While considerable uncertainty remains for that industry, it is well placed to recover strongly as international travel resumes after the pandemic.

Customer deposits increased by 2.8% from year-end 2020 due to strong growth in retail deposits. The Bank continued its consistent issuance of ISK denominated covered bonds to fund the growth in the mortgage book and also issued several private placements in Norwegian and Swedish kronas to refinance maturing debt. The liquidity position of the Bank remains robust, with limited maturities of long-term debt in 2021. The Bank is also very well capitalised, with a total capital ratio of 21.9% at the end of the period, compared to the current 17% regulatory requirement, which was lowered as the counter-cyclical buffer was reduced from 2.0% to zero in 2020.

The COVID-19 pandemic continued to impact the operations of the Bank for the first quarter. Most of the employees in the headquarters are still working from home and customer access to branches has been somewhat restricted. Despite these unusual circumstances, the Bank has managed to be fully operational and the main focus continues to be to help and support our customers through these difficulties.

The Annual General Meeting ("AGM") for the operating year 2020 was held on 18 March 2021. At the AGM shareholders approved that the Bank would pay ISK 3.4 billion in dividend, which amounts to about 50% of the 2020 net income and is in line with the Bank's dividend policy. It was also approved that the Board may convene a special shareholder meeting later in the year where a proposal regarding payment of dividends of profit for previous fiscal years could be suggested.

On 29 January 2021, the Minister of Finance and Economic Affairs made a formal decision to initiate the process of the sale of shares in Íslandsbanki in accordance with the ISFI (Icelandic State Financial Investments) proposal dated 17 December 2020. The ISFI is tasked with preparing Íslandsbanki for a listing on a local regulated stock market and the consequent sale of shares in a public offering (IPO) with the aim of a distributed ownership and the minimum of 25% of shares and a maximum of 35% of shares to be sold. Íslandsbanki has engaged ABN AMRO to act as an independent financial advisor to the Bank and ISFI has engaged their own advisors, joint global co-ordinators and bookrunners. Preparations for the IPO are well under way and the Minister of Finance and Economic Affairs has publicly stated that a listing is expected to take place in the summer of 2021, subject to market conditions.

The Bank has continued on its path to promote sustainability and in April 2021 the Bank joined 42 other leading banks to launch the net-zero banking alliance. The Bank has committed to becoming net-zero before 2040, in line with commitments by the Icelandic Government and 10 years earlier than commitments under the Paris agreement. In April, the Bank was also given the highest rating (90 out of 100 points) for sustainability that has been awarded by local ratings agency Reitun. Furthermore, the Bank has been awarded the Kuðungur (the Conch), the Ministry for the Environment and Natural Resources' environmental prize, for its outstanding work on environmental affairs in the past year.

### Outlook

Given the size of the tourist sector as a source of almost 1/3 of export revenues and employer of around 14% of the labour force in 2019, the broad economic impact of the COVID-19 pandemic has been somewhat milder in Iceland than many feared. GDP contraction measured 6.6% in 2020, with the lions' share of the GDP decline due to a sharp fall in exports while domestic demand held up better than expected and a fall in imports offset the export decline to a degree. A combination of an effective economic policy and broadly successful health measures has mitigated the pandemic impact. Monetary conditions have been substantially eased and the government has introduced a raft of measures to support viable businesses and soften the impact from job loss or temporary closures on affected households. Furthermore, the general good health of balance sheets in both the private and public sectors has increased the scope for counter-cyclical economic policy and supported the resilience of households and corporates, even in the event of a temporary setback.

## Directors' Report

The pace of economic recovery in 2021 will hinge on how rapidly travel conditions normalise and economic activity resumes on a global scale. The increasing pace of the rollout of vaccines so far has gradually increased the upside potential for economic rebound in Iceland. Assuming fading impact from COVID-19 over the coming months, there is a good probability of a return to healthy GDP growth in the latter half of 2021. The Bank's Chief economist expects GDP growth to average 3.2% in 2021, driven by increasing exports as well as a boost to public investment and moderate consumption growth. For 2022, the expected 5.0% GDP growth will be largely driven by increasing domestic demand and further normalisation of the export sector.

With expectations of a strong economic recovery in 2021 and re-opening of Iceland for international tourism, the Bank is well placed to benefit along with its clients. The Bank's capital and liquidity position remains strong and the underlying earnings can be expected to benefit from a movement towards normalised impairments. The Bank has updated its financial targets and the aim is now to achieve a return on equity of 8-10% and a cost-to-income ratio below 45% by 2023.

### Statement by the Board of Directors and the CEO

The interim financial statements for the period 1 January to 31 March 2021 have been prepared on a going concern basis in accordance with the International Accounting Standard (IAS) 34 Interim Financial Reporting as adopted by the European Union; the Act on Annual Accounts, no. 3/2006; the Act on Financial Undertakings, no. 161/2002; and rules on accounting for credit institutions, where applicable.

To the best of our knowledge, these interim financial statements provide a true and fair view of the Group's operating profits and cash flows in the reporting period and its financial position as of 31 March 2021. Furthermore, in our opinion the financial statements and the Director's report give fair view of the main operational developments and achievements and describe the principal risks and uncertainties that the Group faces in its operations.

The Board of Directors and the CEO have today discussed and approved the Condensed Consolidated Interim Financial Statements for the period 1 January to 31 March 2021.

Kópavogur, 5 May 2021

## Report on Review of Condensed Consolidated Interim Financial Statements

### To the Board of Directors and Shareholders of Íslandsbanki hf.

We have reviewed the accompanying Condensed Consolidated Interim Financial Statements of Íslandsbanki hf. and its subsidiaries as at March 31, 2021 which comprise of the Consolidated Interim Statement of Financial Position as at March 31, 2021 and the related Consolidated Interim Income Statement, the Consolidated Interim Statement of Comprehensive Income, the Consolidated Interim Statement of Changes in Equity and Consolidated Interim Statement of Cash Flows for the three months ended 31 March 2021 and explanatory notes. The Board of Directors and CEO are responsible for the preparation and fair presentation of these Condensed Consolidated Interim Financial Statements in accordance with the International Financial Reporting Standard, IAS 34 Interim Financial Reporting as adopted by the EU. Our responsibility is to express a conclusion on these Condensed Consolidated Interim Financial Statements based on our review.

### Scope of Review

We conducted our review in accordance with the International Standard on Review Engagements 2410, Review of Interim Financial Information Performed by the Independent Auditor of the Entity. A review of interim financial statements consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with International Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

### Conclusion

Based on our review nothing has come to our attention that causes us to believe that the accompanying Condensed Consolidated Interim Financial Statements are not prepared, in all material respects, in accordance with the International Financial Reporting Standard, IAS 34 Interim Financial Reporting, as adopted by the EU.

Reykjavík, 5 May 2021

Authorised share capital of the Bank is 10,000 million ordinary shares of ISK 1 each. At 31 March 2021 paid up share capital totalled ISK 65,000 million which is the total stated share capital of the Bank. The Bank has one class of ordinary shares which carry no right to fixed income. The Annual General Meeting ("AGM") for the operating year 2020 was held on 18 March 2021. At the AGM shareholders approved the Board's proposal to pay dividends to shareholders amounting to ISK 3,400 million which is equivalent to ISK 0.34 per share (2019: none). The dividends were paid on 30 March 2021. It was also approved that the Board may convene a special shareholder meeting later in the year where a proposal regarding payment of dividends of profit for previous fiscal years could be suggested.

The first quarter 2020 Statement of Changes in Equity was not reviewed or audited by the Bank's auditor.

The notes on pages 12 to 57 are an integral part of these Condensed Consolidated Interim Financial Statements.

\*For further breakdown see the following page.

The Group has prepared its consolidated interim statement of cash flows using the indirect method. The statement is based on the net profit after tax for the period and shows the cash flows from operating, investing and financing activities and the increase or decrease in cash and cash equivalents during the period.

Interest received from 1 January to 31 March 2021 amounted to ISK 12,578 million (2020: ISK 13,636 million) and interest paid in the same period 2021 amounted to ISK 4,198 million (2020: ISK 5,982 million). Interest is defined as having been paid when it has been deposited into the customer account and is available for the customer's disposal.

The first quarter 2020 Statement of Cash Flows was not reviewed or audited by the Bank's auditor.

The notes on pages 12 to 57 are an integral part of these Condensed Consolidated Interim Financial Statements.

# Notes to the Condensed Consolidated Interim Financial Statements

## 1. Corporate information

Íslandsbanki hf., the parent company, was incorporated on 8 October 2008 and is a limited liability company domiciled in Iceland. The address of its registered office is Hagasmári 3, 201 Kópavogur, Iceland.

The condensed consolidated interim financial statements for the first quarter of 2021 ("the interim financial statements") comprise the financial statements of Íslandsbanki hf. ("the Bank" or "Íslandsbanki") and its subsidiaries together referred to as "the Group".

At the end of the period the Bank was wholly owned by the Icelandic Government. The shares are administered by the Icelandic State Financial Investments in accordance with Act no. 88/2009 on Icelandic State Financial Investments.

The interim financial statements were approved and authorised for issue by the Board of Directors and the CEO of Íslandsbanki hf. on 5 May 2021.

## 2. Basis of preparation

The interim financial statements have been prepared in accordance with the International Accounting Standard (IAS) 34 Interim Financial Reporting, as adopted by the European Union and additional requirements in the Act on Annual Accounts no. 3/2006, the Act on Financial Undertakings no. 161/2002 and rules on accounting for credit institutions.

The interim financial statements do not include all the information required for annual financial statements and should be read in conjunction with the audited consolidated financial statements of the Group for the year ended 31 December 2020, as well as the unaudited Pillar 3 Report for the year 2020. Both are available on the Bank's website: [www.islandsbanki.is](http://www.islandsbanki.is).

The accounting policies and the basis of measurement are unchanged in comparison with Notes 3 and 67 in the consolidated financial statements for the year 2020 except for the changes presented in Note 3.

The interim financial statements are presented in Icelandic króna (ISK), which is the functional currency of Íslandsbanki hf. All amounts presented in ISK have been rounded to the nearest million, except when otherwise indicated. At 31 March 2021 the exchange rate of the ISK against the USD was 126.31 and for the EUR 148.10 (year-end 2020: USD 127.21 and EUR 156.10).

The Group's management has made an assessment of the Group's ability to continue as a going concern and is satisfied that the Group has the resources to continue in business for the foreseeable future. Therefore, the interim financial statements have been prepared on a going concern basis.

### Significant accounting estimates and judgements

The preparation of the interim financial statements requires management to make judgements, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses recognised. Actual results may differ from those estimates.

Estimates and underlying assumptions are under constant review. Changes in accounting estimates are recognised when they occur.

As described in Note 3 in the consolidated financial statements for the year 2020 key sources of estimation uncertainty include the allowance for credit losses, the determination of fair value of financial instruments, and intangible assets.

### Impairment of financial assets, changes from year-end 2020

Note 67.4 in the consolidated financial statements for the year 2020 contains a description of the Group's accounting policies for the impairment of financial assets.

At the end of the first quarter of 2021, the following changes have been made.

The Group's Chief Economist provided three new macroeconomic forecasts on 27 January 2021 which take into account the effects of the COVID-19 pandemic. The base case is shown below while the more optimistic and pessimistic forecasts are available on the Bank's website.

## Notes to the Condensed Consolidated Interim Financial Statements

### 2. Cont'd

<b>Change in economic indicators %</b>	Estimate 2020	Forecast 2021	Forecast 2022	Forecast 2023	Forecast 2024
Economic growth .....	( 8.7)	3.2	5.0	3.6	2.8
Housing prices in Iceland .....	6.4	6.5	4.7	4.4	3.5
Purchasing power .....	3.0	1.1	2.1	2.1	1.6
ISK exchange rate index .....	11.1	( 1.6)	( 3.3)	( 3.2)	-
Policy rate, Central Bank of Iceland .....	1.5	0.8	1.5	2.6	3.3
Inflation .....	2.8	3.0	2.2	2.3	2.2
Capital formation .....	( 10.5)	3.8	3.5	8.4	3.5
thereof capital formation in industry .....	( 11.8)	5.6	9.3	5.8	3.0

The Group continues to make temporary changes to the impairment model due to the COVID-19 pandemic. The Group's impairment process allows for temporary changes to the impairment model to account for circumstances when it becomes evident that existing or expected risk factors have not been appropriately considered in the credit risk rating or modelling process. The COVID-19 pandemic has created such circumstances for the tourism industry and therefore an adjustment is warranted. To account for the material uncertainty in the operating environment of companies in the tourism industry, not reflected in their current risk class, they have been further classified into four impact groups as described in Note 45. Where the increase was found to be significant (groups 2 - 4), the exposure was transferred to Stage 2. In addition, an overlay factor was applied to the expected credit loss, comparable to an increase in up to three risk classes, and a higher haircut was applied to value of collateral for the higher impact groups in the more severe scenarios. The common risk factor in tourism was found to apply to loans to customers with a net carrying amount of ISK 93,780 million and the cumulative effect of the stage transfer and credit loss overlay amounted to ISK 7,729 million.

The All Risk Committee determined that it was appropriate to adjust the weights of the scenarios due to the COVID-19 pandemic, generally the scenarios are weighted 25%-50%-25% (good, base, bad) but it was determined appropriate to set the weights at 10%-55%-35%, as this would best represent the probability-weighted average over all possible scenarios. When deciding on the appropriate weights for the three scenarios, management used sensitivity analysis that indicated that a shift of 5% weight from the baseline to the pessimistic scenario would increase the impairment allowance by ISK 550 million while a 5% shift from the baseline to the optimistic scenario would in decrease the allowance by ISK 250 million.

Substantial uncertainty remains with regards to the impact of the COVID-19 pandemic on the credit quality of the Group's credit exposures in future periods and therefore the assessment of expected credit losses.

### 3. Changes to accounting policies

The accounting policies in the interim financial statements are consistent with those applied in the consolidated financial statements for the year 2020, except for amendments related to the Phase 2 of the Interest Rate Benchmark Reform as described in Note 4 in the consolidated financial statements for the year 2020. The amendments did not have a significant impact on the interim financial statements.

# Notes to the Condensed Consolidated Interim Financial Statements

## 4. Operating segments

Segment information is presented in accordance with the Group's management and internal reporting structure. The segments' operating result are reported to the Board of Directors and the Chief Executive Officer, who are responsible for allocating resources to the reportable segments and assessing their financial performance.

An operating segment is a distinguishable component of the Group, for which discrete financial information is available, that engages in business activities from which it may earn revenues and incur expenses, including revenues and expenses that relate to transactions with any of the Group's other components. Each operating segment is engaged in providing products or services which are subject to risk and return that are different from those of other operating segments. The accounting policies for the reportable segments are in line with the Group's accounting policies. The Group operates mainly in the Icelandic market.

The Bank has three main business segments: Personal Banking, Business Banking and Corporate & Investment Banking. Operating segments pay and receive interest to and from Treasury to reflect the allocation of capital, funding costs and the relevant risk premium. Capital allocation to the business units is based on the pillar 1 regulatory capital requirement, the pillar 2-R capital requirement calculated according to the Bank's ICAAP and the combined buffer requirement as stipulated in the Act on Financial Undertakings. Income tax and bank tax with breakdown for each segment is according to the current tax rates.

The Group comprises the following operating segments:

### Personal Banking

Personal Banking provides comprehensive financial services to individuals, such as lending, savings and payments. Íslandsbanki's customers are increasingly taking care of their day-to-day banking via digital solutions such as apps, the online bank and the secure web chat. Customers can also visit the Bank's efficient branch network for comprehensive consultancy services and contact the contact centre.

### Business Banking

Business Banking provides small and medium-sized enterprises (SMEs) with comprehensive financial services and Ergo, the Bank's asset financing service, is also part of the division. Business Banking serves customers in business centres and branches close to their business. Via online banking and app, customers have full overview of their business and day-to-day operations are easy to manage.

### Corporate & Investment Banking

Corporate & Investment Banking provides universal banking services to large companies, municipalities, institutional investors, and affluent individuals. Services include customised products and services to customers including lending and advisory, risk management, brokerage, and private banking services. The division is sector-focused, building and maintaining relationships with key customer segments within Iceland. Outside of Iceland, Íslandsbanki has a special focus on the North Atlantic seafood industry, leveraging its expertise in the domestic market and global contacts.

### Treasury and Proprietary Trading

Treasury is responsible for funding the Bank's operations and for managing the internal pricing framework. It is also responsible for the Bank's balance sheet management and for relations with investors, financial institutions, stock exchanges, and rating agencies. Equity that is not allocated to business units sits within Treasury. Proprietary Trading includes equity and debt investments in the trading book and banking book.

### Cost centres

Cost centres comprise the CEO's office (Human Resources, Marketing & Communications, Strategy, and Legal), Finance excluding Treasury and Proprietary Trading, IT, Risk Management and Compliance. Group Internal Audit is included in cost centres, however, it is independent from the Bank and the Chief Audit Executive reports directly to the Bank's Board of Directors.

### Subsidiaries, eliminations and adjustments

Subsidiaries include Íslandssjóðir hf., Allianz Ísland hf. and other less significant subsidiaries (see Note 25).

Assets and liabilities of subsidiaries, that are classified as non-current assets and disposal groups held for sale, are included in the column "Other subsidiaries".

All inter-company eliminations are included in the column "Eliminations & adjustments".

Following is an overview showing the Group's performance with a breakdown by operating segments.

## Notes to the Condensed Consolidated Interim Financial Statements

### 12. Net impairment on financial assets

	2021 1.1-31.3	2020 1.1-31.3
Expected credit losses, on-balance sheet items*	( 455)	( 3,339)
Expected credit losses, off-balance sheet items	( 63)	( 151)
<b>Net impairment on financial assets</b>	<b>( 518)</b>	<b>( 3,490)</b>

\*The main changes in the expected credit loss allowance are: an increase related to the COVID-19 pandemic (ISK 960 million), a decrease due to a more favourable economic environment (ISK 363 million) and a decreased expected credit loss for a few customers (ISK 215 million). For further information see Note 2.

### 13. Income tax expense

Recognised income tax is based on applicable tax laws. The income tax rate for legal entities in 2021 is 20% (2020: 20%). Special financial activities tax is calculated as 6% of the Bank's taxable profit exceeding ISK 1 billion in accordance with the Act on Financial Activities Tax no. 165/2011. The effective income tax rate in the Group's income statement for the first quarter 2021 is 22.4% (2020: negative 212.4%).

	2021 1.1-31.3	2020 1.1-31.3
Current tax expense excluding discontinued operations	1,450	1,467
Special financial activities tax	363	370
Difference in prior year's calculated income tax	2	-
Changes in deferred tax assets and deferred tax liabilities	( 779)	( 1,068)
<b>Income tax recognised in the income statement</b>	<b>1,036</b>	<b>769</b>

	2021 1.1-31.3		2020 1.1-31.3	
Profit (loss) before tax	4,635		( 362)	
20% income tax calculated on the profit (loss) for the period	927	20.0%	( 72)	20.0%
Special financial activities tax	363	7.8%	370	( 102.2%)
Expenses (income) not subject to tax	( 326)	( 7.0%)	371	( 102.5%)
Non-deductible expenses	82	1.8%	72	( 20.0%)
Other differences	( 10)	( 0.2%)	28	( 7.7%)
<b>Effective income tax expense</b>	<b>1,036</b>	<b>22.4%</b>	<b>769</b>	<b>( 212.4%)</b>

The Bank is taxed jointly with its subsidiary Íslandssjóðir hf.

### 14. Discontinued operations, net of income tax

	2021 1.1-31.3	2020 1.1-31.3
Net profit (loss) from foreclosed assets	27	( 47)
Net loss from disposal groups held for sale	( 6)	( 217)
Income tax expense	( 5)	19
<b>Discontinued operations, net of income tax</b>	<b>16</b>	<b>( 245)</b>

## Notes to the Condensed Consolidated Interim Financial Statements

### 15. Earnings per share

	Discontinued operations			
	Excluded		Included	
	2021	2020	2021	2020
	1.1-31.3	1.1-31.3	1.1-31.3	1.1-31.3
Profit (loss) attributable to shareholders of the Bank .....	3,601	( 1,006)	3,617	( 1,251)
Weighted average number of outstanding shares .....	10,000	10,000	10,000	10,000
<b>Basic earnings per share</b>	<b>0.36</b>	<b>( 0.10)</b>	<b>0.36</b>	<b>( 0.13)</b>

The Group's basic and diluted earnings per share are equal as the Group has not issued any options, warrants, convertibles, or other financial instruments that dilute earnings per share (2020: none).

### 16. Classification of financial assets and financial liabilities

### 17. Fair value information for financial instruments

#### Financial instruments carried at fair value

The fair value of a financial instrument is the transaction price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Where a market price is not readily available, the Group applies valuation techniques based on estimates and assumptions that are consistent with that which market participants would use in setting a price for the financial instrument.

The table below shows financial instruments carried at fair value at 31 March 2021 categorised into three levels of fair value hierarchy that reflect the type of inputs used in making the fair value measurements. The different levels have been defined as follows:

Level 1: Inputs that are quoted prices (unadjusted) in active markets for identical assets or liabilities that the Group can access at the measurement date.

Level 2: Valuation techniques based on observable inputs other than the quoted prices included in Level 1, either directly (i.e. as prices) or indirectly (i.e. derived from prices).

Level 3: Valuation techniques based on significant unobservable inputs, e.g. internal assumptions.

<b>At 31 March 2021</b>	Level 1	Level 2	Level 3	Total
Bonds and debt instruments .....	103,600	-	27	103,627
Derivatives .....	-	2,536	-	2,536
Shares and equity instruments .....	22,475	2	3,286	25,763
Non-current assets and disposal groups held for sale .....	-	-	1,201	1,201
<b>Total financial assets</b>	<b>126,075</b>	<b>2,538</b>	<b>4,514</b>	<b>133,127</b>
Short positions .....	323	-	-	323
Derivative instruments .....	-	9,210	-	9,210
Debt issued and other borrowed funds designated as at FVTPL .....	89,903	-	-	89,903
<b>Total financial liabilities</b>	<b>90,226</b>	<b>9,210</b>	<b>-</b>	<b>99,436</b>

## Notes to the Condensed Consolidated Interim Financial Statements

### 17. Cont'd

<b>At 31 December 2020</b>	Level 1	Level 2	Level 3	Total
Bonds and debt instruments .....	128,071	-	145	128,216
Derivatives .....	-	6,647	-	6,647

Other changes .....	35	49	-
<b>Fair value at 31 December 2020</b>	<b>145</b>	<b>2,890</b>	<b>1,266</b>

At the end of each reporting period the Group determines whether transfers have occurred between levels in the hierarchy, by reassessing categorisation based on the lowest level input that is significant to the fair value measurement as a whole. No transfers between levels took place during the period.

#### *Valuation process*

The responsibility for the valuation of the fair value of financial instruments lies with the relevant business units. Each quarter, the business units present a valuation report to the Investment Committee for approval. The report and its assumptions are reviewed by Risk Management.

#### *Valuation techniques*

Where applicable, fair values are determined using quoted prices in active markets for identical assets and liabilities. In other cases, where there is no active market, the fair value is estimated using valuation techniques such as net present value and discounted cash flow models; comparison with similar instruments for which observable market data exists; net asset value (NAV) for investment fund units or expected recovery for distressed bonds. These valuation techniques are based on various assumptions and inputs such as risk-free rate, expected revenue growth and credit and liquidity spreads. In some cases, where significant inputs into these models are not observable, expert judgement and estimation for these inputs are required.

# Notes to the Condensed Consolidated Interim Financial Statements

## 17. Cont'd

*Level 1: Fair value established from quoted market prices.*

Assets at this level are financial assets and financial liabilities containing actively traded bonds and equities that are listed either domestically or abroad.

*Level 2: Fair value established using valuation techniques with observable market information.*

Assets at this level are assets and liabilities containing domestic bonds, equities as well as derivatives. For interest rate derivatives contracts such as interest rate swaps (IRS) and cross-currency interest rate swaps (CIRS) the Group calculates the net present value of estimated future cash flows based on yield curves with key inputs such as interest swap rates and forward-rate agreements (FRAs) rates. Foreign-currency forwards and foreign-currency swaps are valued using the FX spot rate adjusted for forward pricing points that can be obtained from market sources. These products are classified as Level 2. Bond forwards and equity forwards are also classified as Level 2 as they are valued using standard models with key inputs observed from stock prices, estimated dividend rates and funding rates.

*Level 3: Fair value established using valuation techniques using significant unobservable market information.*

Assets at this level contain primarily unlisted and illiquid equities and bonds. Unlisted equities and bonds are initially recorded at their transaction price but are revalued each quarter based on the models as described above.

At 31 March 2021 the Group's Level 3 shares amounted to ISK 3,286 million:

-These include shares in seven professional investment funds and investment companies investing in unlisted equities and specialised investments in Iceland totalling ISK 1,681 million. The Group receives information from fund managers which use valuation models for the valuation of these equities.

-Other Level 3 shares amount to ISK 1,605 million.

At 31 March 2021 the Group's Level 3 bonds amounted to ISK 27 million:

-The majority of the amount in Level 3 bonds is estimated by discounting cash flow where the yield is the contractual currency's base rate with a premium that is decided by expert judgement on projected risk and financing cost.

At 31 March 2021 the Group's Level 3 shares classified as an asset held for sale amounted to ISK 1,201 million:

The Group holds Series C preferred shares in Visa Inc. and at 31 March 2021 the valuation of the shares amounted to ISK 1,201 million, the shares were sold at the beginning of April 2021 for the valuation amount.

### *Sensitivity analysis for Level 3 assets*

The valuations of Level 3 assets are in general uncertain and subject to various factors. The favourable and unfavourable scenarios can be considered as being likely movements in valuation within a year. The very favourable and very unfavourable scenarios are considered less likely, but not impossible and are not worst-case scenarios for some of the assets.

The table below shows how profit (loss) and total comprehensive income would have been affected if one or more of the inputs for fair value measurement in Level 3 were changed.

### **At 31 March 2021**

	Carrying amount	Very favourable	Favourable	Unfavourable	Very unfavourable
<b>Effect on profit or (loss):</b>					
Level 3 Bonds and debt instruments .....	27	290	68	( 13)	( 27)
Level 3 Shares and equity instruments .....	3,286	3,020	1,384	( 867)	( 1,184)

### **At 31 December 2020**

	Carrying amount	Very favourable	Favourable	Unfavourable	Very unfavourable
<b>Effect on profit or (loss):</b>					
Level 3 Bonds and debt instruments .....	145	1,015	773	( 132)	( 145)
Level 3 Shares and equity instruments .....	2,890	1,897	539	( 571)	( 878)
<b>Effect on comprehensive income:</b>					
Level 3 Non-current assets and disposal groups held for sale .....	1,266	1,898	949	( 633)	( 1,266)

# Notes to the Condensed Consolidated Interim Financial Statements

## 18. Financial instruments not carried at fair value

### Assets

The fair value of "Loans to customers" may differ from their net carrying amount because the interest rates they carry may not reflect the interest rates that similar new loans would carry. The fair value is estimated by subtracting from or adding to the net carrying amount of the loans the discounted interest rate difference calculated from the reporting date until the next interest reset or maturity, whichever comes first. Since the interest rate difference is estimated using internal models these assets are classified as Level 3.

For "Cash and balances with Central Bank", "Loans to credit institutions" and "Other financial assets" the fair value is adequately approximated by the carrying amount as they are short-term in nature. They are thus classified as Level 2.

### Liabilities

The fair value of a financial liability with a demand feature, such as a demand deposit, is not less than the amount payable on demand, discounted from the first date that the amount could be required to be paid. Most deposits are on demand or carry floating interest rates and as such their carrying amount is considered a good approximation of their fair value. The fair value for longer term fixed rate deposits is calculated with a duration approach, using the difference in each liability's current interest rate from the rate that a similar deposit would carry today. All deposits are classified as Level 2 based on the use of observable market interest rates to estimate the fair value.

Observed market value is used for the fair value of "Debt issued and other borrowed funds" where it is available. Issued bonds and bills with quoted market prices are classified as Level 1. If there is no quoted market price the fair value of the debt is valued in the same manner as deposits if it carries a fixed rate. If the debt carries a floating rate its fair value is estimated by comparing the margin with the Group's current funding premium on similar debt. These liabilities are classified as Level 2. The funding premium is based on the interest margin in the Group's issued papers including covered bonds, commercial papers as well as foreign currency denominated bonds.

Other financial liabilities mainly include unsettled securities transactions and payments due to leasing contracts and they are classified as Level 2 since their value is not observable from active market prices. Due to the short-term nature of these liabilities their carrying amount is considered a good approximation of their fair value.

The following table shows the fair value measurement and classification of the Group's assets and liabilities not carried at fair value. The different levels are defined in Note 17.

	Level 1	Level 2	Level 3	Total fair value	Carrying amount
<b>At 31 March 2021</b>					
Cash and balances with Central Bank .....	-	88,748	-	88,748	88,748

The Group uses derivatives to hedge currency exposure, interest rate risk in the banking book as well as inflation risk. The Group carries relatively low indirect exposure due to margin trading with clients and the Group holds collaterals for possible losses. Other derivatives in the Group held for trading or for other purposes are insignificant.

Short positions are in Icelandic Government bonds and bonds issued by municipalities, banks and public companies. As a primary dealer the Group has access to securities lending facilities provided by the Central Bank and other issuers. Majority of the securities lending facilities have a maturity of less than a year.

The Group applies hedge accounting only with respect to certain EUR denominated interest rate swaps, whereby the Group pays floating rate interest and receives fixed rate interest. The interest rate swaps are hedging the exposure of changes in the fair value of certain fixed-rate EUR denominated bonds (see Note 32) arising from changes in EURIBOR benchmark interest rates. The Group applies fair value hedge accounting to the hedging relationships and for the purpose of evaluating whether the hedging relationship is expected to be highly effective, the Group assumes that the benchmark interest rate is not altered as a result of IBOR reform. At 31 March 2021 the total fair value of the interest rate swaps was positive and amounted to ISK 756 million (2020: ISK 1,008 million) and their total notional amount was ISK 44,430 million (2020: ISK 46,830).

Financial assets pledged as collateral in foreign banks .....	1,924	167
<b>Pledged assets against liabilities</b>	<b>287,155</b>	<b>242,156</b>

The Group has pledged assets against the issuance of covered bonds under Icelandic law, which are pledged on a pool of consumer mortgage loans. The Bank has issued additional covered bonds for its own use which accounts for a portion of the pledged assets. The carrying amount of these bonds at 31 March 2021 was ISK 33,477 million.

The Group has also pledged assets with the Central Bank to ensure the clearing of the Icelandic payment system as well as other contracts with the Central Bank, moreover, it has pledged cash in foreign banks and financial institutions, mainly as collateral for trades under ISDA agreements to hedge market risk.

## Notes to the Condensed Consolidated Interim Financial Statements

### 32. Cont'd

\*These bond issuances are classified as being designated as at fair value through profit or loss. At 31 March 2021 the total carrying amount of the bonds amounted to ISK 89,903 million and included in the amount are fair value changes amounting to ISK 754 million. The carrying amount of the bonds at 31 March 2021 was ISK 321 million higher than the contractual amount due at maturity.

\*\*The Group applies hedge accounting to this bond issuance and uses certain EUR denominated interest rate swaps as hedging instruments (see Note 22). The interest rate swaps are hedging the exposure of the Group's changes in the fair value of this fixed-rate EUR denominated bond arising from changes in EURIBOR benchmark interest rates. The Group applies fair value hedge accounting to the hedging relationships and for the purpose of evaluating whether the hedging relationship is expected to be highly effective, the Group assumes that the benchmark interest rate is not altered as a result of IBOR reform. At 31 March 2021 the total carrying amount of the bond issuance amounted to ISK 45,104 million and included in the amount are fair value changes amounting to ISK 679 million.

The Bank did not repurchase own bonds during the period.

The Bank has issued additional covered bonds for its own use, for example for the purpose of securities lending with regards to market making agreements. These covered bond amounts are not included in the total.

### 33. Subordinated loans

	Issued	Maturity	Interest	31.3.2021	31.12.2020
Loans which qualify as Tier 2 capital:					
Subordinated loans in SEK .....	2017	2027 At maturity	Floating, STIBOR + 2.0%	10,838	11,646

## 37. Related party

Íslandsbanki is wholly owned by the Icelandic Government. The shares are administered by the Icelandic State Financial Investments (ISFI). As a result, the Icelandic Government and the Icelandic State Financial Investments are defined as related parties. The Group has applied the partial exemption for government-related entities, as described in IAS 24.

The Board of Directors and key management personnel of the Bank, ISFI and subsidiaries of the Bank, close family members of individuals referred to herein and legal entities controlled by them, are defined as related parties.

The Group's associates are also defined as related parties.

The Group's products and services are offered to the Icelandic Government and government-related entities in competition with other vendors and under generally accepted commercial terms. In a similar manner the Group entities purchase products and services from government-related entities under generally accepted commercial terms. Transactions with related parties were made in the ordinary course of business on substantially the same terms, including interest rates and collateral, as those prevailing at the time for comparable transactions with third party counterparties.

Cash and balances with the Central Bank are disclosed under Note 20 and Deposits from the Central Bank are disclosed under Note 29.

All loans to employees are provided on general business terms of the Group and the balances do not reflect collaterals held by the Group.

At 31 March 2021 total of ISK 9.2 million (at year-end 2020: none) were recognised as expected credit losses against balances outstanding, thereof ISK 2.4 million were recognised as Stage 1 expected credit losses and ISK 6.8 million were recognised as Stage 2 expected credit losses. No share option programmes were operated during the period.

### 38. Contingencies

#### Contingent liabilities

##### Borgun hf. – Landsbankinn hf. case

Borgun hf., a former subsidiary of Íslandsbanki, is a payment acquirer and issuing processor. Landsbankinn hf. sold its 31.2% stake in Borgun hf. in late 2014. Landsbankinn claims that Borgun's management did not disclose all available information that might have affected the value of Borgun hf. during the sales process, namely the value of its stake in Visa Europe which was sold to Visa International shortly after the Borgun hf. sale. In order to reclaim the alleged loss, Landsbankinn filed a lawsuit against Borgun hf. and others on 12 January 2017, claiming the right to damages for having been deprived of the true value of the stake involved in the sale. Landsbankinn does not quantify the claim, but its estimate of the lost profit from having sold its shares in Borgun hf. is approximately ISK 1,930 million. Court appointed assessors presented their assessment in November 2019. A reassessment was demanded and senior assessors, appointed by the court. The senior assessors have not rendered their assessment. It is uncertain when a ruling is to be expected. In 2020, the Group closed an agreement on the sale of all its stake in Borgun hf. In that agreement Íslandsbanki undertook to reimburse 63.47% of losses incurred by Borgun hf. or the buyer as a result of an unfavourable outcome in the Landsbanki case. The Group has not recognised a provision as a result of this event.

### 39. Events after the reporting period

Íslandssjóðir hf., a wholly owned subsidiary of Íslandsbanki, is a fund management company that manages assets on behalf of customers. One of the assets under the management of Íslandssjóðir hf. is the alternative investment fund 105 Miðborg slhf., a limited partnership that is constructing a real estate project that includes residential housing, hotel and office facilities. In December 2017 Íslenskir aðalverktakar hf. (ÍAV) and 105 Miðborg slhf. signed a contract where ÍAV undertook to be the steering contractor for the first phase of the project. On 19 February 2021, 105 Miðborg slhf. terminated the agreement claiming default by ÍAV. On 3 May 2021, ÍAV filed a suit against both Miðborg slhf. and Íslandssjóðir hf., demanding payment of approximately ISK 3.8 billion for services allegedly rendered. 105 Miðborg slhf. has previously rejected ÍAV's claims and is currently preparing a counter suit against ÍAV. Íslandssjóðir hf. believes, and has previously stated, that the company is not directly involved in the dispute. Given that the suit was filed two days ago the Group has not had an opportunity to scrutinise the claims made in the suit. The Group has not recognised a provision as a result of this event.

No other events have arisen after the reporting period that require amendments or additional disclosures in the interim financial statements for the first quarter 2021.

# Notes to the Condensed Consolidated Interim Financial Statements

## 40. Risk management

### Risk governance

The Group is exposed to various risk factors and managing these risks is an integral part of its operations. More information about the Group's risk management and risk assessment processes is available in the unaudited Pillar 3 2020 Report, which is available on the Bank's website: [www.islandsbanki.is](http://www.islandsbanki.is).

## 41. Credit risk

Credit risk is defined as current or prospective risk to earnings and capital arising from an obligor's potential failure to meet the terms of any financial contract with the Group.

Credit concentration risk is the significantly increased risk that is driven by common underlying factors, e.g. industrial sector, economy, geographical location, type of financial instrument or due to connections or relations among counterparties. This includes exposures to parties under common control and significant exposures to groups of counterparties whose likelihood of default is driven by common underlying factors.

Credit risk arises principally from loans and advances to customers and other banks but also from balances with the Central Bank and off-balance sheet items such as financial guarantees, loan commitments and derivatives.

The Group has policies and procedures dedicated to accepting, measuring, and managing credit risk. The objective of the Group's credit risk management is to achieve an appropriate balance between risk and return and to minimise potential adverse effects of credit risk on the Group's financial performance.

A thorough analysis of the counterparty's financial standing, analysis of past and estimated future cash flows as well as the borrower's general ability to repay its obligations forms the basis for all credit decisions. The Group structures the levels of credit risk it undertakes by placing limits on the amount of risk accepted in relation to one borrower, groups of borrowers, countries and industry segments. The Group measures and consolidates its credit risk for each counterparty or group of connected clients in accordance with internal and external criteria of connection between parties.

The Group employs a range of policies and practices to mitigate credit risk. The most traditional of these is the taking of security in borrower's assets. The principal collateral types for loans are properties, vehicles, equipment, vessels and securities. When applicable, other credit risk mitigants are employed.

## Notes to the Condensed Consolidated Interim Financial Statements

### 42. Maximum credit exposure

The Group's credit risk exposure comprises both on-balance sheet and off-balance sheet items. Maximum exposure to credit risk for on-balance sheet assets is the net carrying amount as reported in the statement of financial position. The maximum exposure for off-balance sheet items is the amount that the Group might have to pay out against financial guarantees and loan commitments, less provisions that have been made because of these items. The maximum credit exposure for a derivative contract is calculated by adding potential future credit exposure to the positive market value of the contract.

The industry breakdown shows the credit exposure by industry classification. The breakdown follows an internal industry classification which is based on the Icelandic ISAT2008 that derives from the European NACE Rev. 2 classification standard.

The Government guarantee schemes issued in response to the COVID-19 pandemic are presented in the line item "Loans to customers". Of these, ISK 2,379 million are subject to 100% Government guarantee, ISK 1,065 million to 85% Government guarantee and ISK 542 million to 70% Government guarantee.

As a part of the agreement on the sale of Borgun hf. in 2020 the Group took on certain guarantees with regards to chargeback risk that Borgun hf. is exposed to through its operations, which at 31 March 2021 amounted to about ISK 134 million. These guarantees are not included in the table below.

The Group's credit exposure, before taking account of any collateral held or other credit enhancements, is as follows:

At 31 March 2021	Public sector and non-profit organisations											Total

### 43. Credit exposure covered by collateral

Collateral and other credit mitigants vary between types of obligors and credit facilities. Loans to credit institutions are usually unsecured. For loans to individuals the principal collateral taken is residential property against mortgages. In the case of corporate entities the Group takes a charge over assets such as real estate, vessels, cash and securities as well as other collateral including accounts receivables, inventory, vehicles and equipment. Loans to government entities and to municipalities are more often than not unsecured. Derivative exposures are generally made under ISDA master agreements with Credit Support Annex or corresponding terms with pledged collateral in the form of cash and government bonds.

In some cases the Group uses guarantees as a credit enhancement but since guarantees effectively transfer credit risk from one counterparty to another they do not represent a reduction in maximum exposure to credit risk. Exception from this are Government guarantees issued in response to the COVID-19 pandemic which are shown under other collateral. Covenants in loan agreements are also an important credit enhancement but do not reduce maximum credit exposure.

## Notes to the Condensed Consolidated Interim Financial Statements

### 43. Cont'd

Valuation of collateral is based on market price, official valuation for tax purposes or expert opinion of the Group's employees, depending on availability. In the case of fishing vessels the associated fishing quota is included in the valuation. Collateral is allocated according to the gross carrying amount of loans and nominal off-balance sheet items, and is measured without including the effect of overcollateralisation. This means that if some loans have collateral values in excess of their gross carrying amount, then the excess is removed in order to reflect the Group's actual maximum exposure to credit risk. The total value of pledged assets can thus be higher than the cover indicates. The maximum credit risk exposure is measured on net carrying value basis, and therefore collateral allocation can in some instances be higher. For capital leases the Group remains the owner of the leased object. In total ISK 37,135 million of the collateral are leased objects.

The following tables show the maximum exposure to credit risk by class of financial asset and collateral held against those exposures. An overview of collateral held by the Group against credit exposure is shown below for exposures in Stages 1 and 2 (non credit-impaired) and exposures in Stage 3 (credit-impaired):

<b>At 31 March 2021</b>	Maximum exposure to credit risk	Real estate	Vessels	Cash & securities	Vehicles & equipment	Other collateral	Total credit exposure covered by collateral	Total credit exposure not covered by collateral	Associated ECL

# Notes to the Condensed Consolidated Interim Financial Statements

## 44. Credit quality of financial assets

The following table provides the gross carrying amount of loans and credit risk exposure on loan commitments and financial guarantees. Amounts are broken down by risk class and the method by which their respective credit loss allowances (ECL) are calculated, i.e. Stage 1, 2 and 3.

The Group uses internal rating models to assess the default probability of corporate and retail customers. The models assign each customer to one of ten risk classes. One risk class is for customers in default (risk class 10), and nine risk classes are for performing customers (risk classes 1-9). Risk classes are assigned on customer level and not facility level.

The rating of corporate customers is based on a company's most recent financial statement, together with a qualitative assessment of its management, market position and industry sector.

For retail customers the Group uses two different statistical rating models. One model is for individuals and another is for small companies with a total exposure to the Group of less than ISK 150 million. These models are behavioural scoring models and use information about a customer's payment history, amount of debt and deposits, and demographic variables to assess the probability that a customer will default on any of his obligations within 12 months of the rating assessment.

Risk classes 1-4 represent low risk, risk classes 5-6 moderate risk, risk classes 7-8 increased risk, risk class 9 high risk, and risk class 10 represents customers that are in default. Unrated are loans that are yet to be rated.

Further information on the risk classes, including the mapping from risk classes to the probability of default, can be found in Section 4.2.2 of the unaudited Pillar 3 2020 Report.

The same customer can have loans and off-balance sheet commitments in Stages 1 and 2 simultaneously. However, if a customer has an exposure in Stage 3 then all other loans and commitments are classified as Stage 3 as well.

### At 31 March 2021

### 45. Loans to customers in the tourism industry likely to be vulnerable to COVID-19 pandemic

Companies susceptible to the impact of COVID-19 were classified into four groups based on an assessment of how much an increase in credit risk these companies face in the short, medium and long term. In addition, to account for the material uncertainty in the operating environment of companies in the tourism industry, not reflected in their current risk class, they are further classified into four groups based on an assessment of how vulnerable they are to various assumptions on when tourists can be expected to start visiting Iceland again. The base case assumes around 700.000 tourists in Iceland in 2021.

Impact group 1: viable even though significantly fewer tourists arrive in the year 2021

Impact group 2: viable with forbearance even though significantly fewer tourists arrive in the year 2021

Impact group 3: viable if the number of tourists in the year 2021 is similar to the base case

Impact group 4: viable if the year 2021 turns out to be better than the base case

Where the increase was found to be significant (groups 2-4), the exposure was transferred to Stage 2. In addition, an overlay factor was applied to the expected credit loss, comparable to an increase in up to three risk classes, and a higher haircut was applied to value of collateral for the higher impact groups in the more severe scenarios.

#### At 31 March 2021

### 46. Forbearance

When restructuring or modification measures are believed to be more appropriate than collection procedures, the Group offers several debt relief measures and restructuring frameworks for customers in financial difficulties. These forbearance measures include temporary payment holidays, extension of loan terms, capitalisation of arrears and waiving of covenants.

The relationship between forbearance and stages is discussed in Note 67.4 in the consolidated financial statements for the year 2020.

Once an asset has been classified as forborne, it will remain forborne for a minimum 24-month probation period. In order for a loan to be reclassified out of the forborne category, the customer has to meet all of the following criteria:

- All of the customer's facilities have to be considered performing; and
- The customer does not have any contract that is more than 30 days past due; and
- The probation period of two years has passed from the date of the forbearance event; and
- Regular payments of more than an insignificant amount of principal or interest have been made during at least half of the probation period

Because of the COVID-19 pandemic, the Group entered into an agreement with other financial institutions and lenders in Iceland to provide a moratorium for customers, uniformly executed across institutions. In the interim financial statements for the third quarter of 2020 the Group showed the extent of the payment moratoria granted by the Group under these initiatives. The agreement expired on 30 September 2020 and all moratoria under it has expired. Further extensions of moratoria has been granted on a case-by-case basis and is now classified as forbearance.

The tourism industry is an important economic sector in Iceland but due to the nature of tourism, its effects are not limited to hotels, car rentals and tour guides. The Group therefore monitors the tourism industry internally as a quasi-sector instead of a new separate sector. Real estate companies that do not operate directly in the tourism sector but rely in part on rental income from such activities explain around half of the forbearance amount for companies not in tourism.

The following table provides a summary of the Group's forborne assets. The loans that previously were in payment moratorium and are now forborne are shown separately.

### 47. Assets obtained by taking possession of collateral

Details of non-financial assets obtained by the Group during the period by taking possession of collateral held as security against loans.

	31.3.2021	31.12.2020
Property and land .....	46	1,754
Industrial equipment and vehicles .....	40	86
<b>Total</b>	<b>86</b>	<b>1,840</b>

The Group pursues realisation of the collateral in an orderly manner. The Group does not generally use the non-cash collateral for its own operations.

# Notes to the Condensed Consolidated Interim Financial Statements

## 48. Write-offs

When the Group has no reasonable expectations of recovering a credit exposure or when it is uneconomical to pursue legal collection, the financial asset is written off. A write-off does not change the debt obligation which is therefore still subject to enforcement activity. Any recoveries of amounts previously written off are credited to the income statement.

Gross carrying amount written off and still subject to enforcement activity	2021	2020
	1.1-31.3	1.1-31.3
Individuals .....	49	128
Companies .....	153	72
<b>Total</b>	<b>202</b>	<b>200</b>

## 49. Large exposures disclosure

When the Group's total exposure to a group of connected clients is 10% or higher of the Group's capital base it is considered a large exposure. Both on-balance sheet and off-balance sheet items from all types of financial instruments are included in the exposure as defined by regulation no. 233/2017. The Group has internal criteria that define connections between clients. These criteria reflect the Group's interpretation of Article (1)(a) of the Act on Financial Undertakings no. 161/2002, where groups of connected clients are defined. Since the interim financial statements for the first quarter of the year are not audited, the official capital is based on reviewed own fund items at 31 December 2021.

The exposure is evaluated both before and after credit risk mitigating effects. After mitigating effects, the Group currently has one large exposure. No large exposure is therefore above the maximum 25% single large exposure limit set by the law.

The following tables show the Group's large exposures as a percentage of the Group's capital base, before and after eligible credit risk mitigating effects.

### At 31 March 2021

Groups of connected clients:	Before	After
Group 1 .....	66%	-
Group 2 .....	10%	10%

### At 31 December 2020

Groups of connected clients:	Before	After
Group 1 .....	65%	-
Group 2 .....	13%	10%

# Notes to the Condensed Consolidated Interim Financial Statements

## 50. Liquidity risk

The Group defines liquidity risk as the risk of not being able to fund its financial obligations or planned growth, or only being able to do so substantially above the prevailing market cost of funds.

The Group's main source of funding is customer deposits. Treasury is responsible for the Bank's funding and liquidity management in line with internal and regulatory limits and policies. Treasury manages the Bank's intraday liquidity. Risk Management, as the second line of defence, is responsible for independent reporting on the liquidity position to internal and external stakeholders and providing a holistic view on liquidity risk on a consolidated basis.

## 51. Liquidity coverage and Net stable funding ratio

Key measures for the assessment of liquidity risk are the Liquidity Coverage Ratio (LCR) and Net Stable Funding Ratio (NSFR). The Central Bank of Iceland, which is the main supervisory authority regarding liquidity risk, has incorporated the LCR and the NSFR based on the CRD IV standards into the rules on liquidity ratio and the rules on funding ratio in foreign currencies. In addition, the Group complies with the Financial Supervisory Authority of the Central Bank's guidelines no. 2/2010 on best practices in liquidity management and liquidity coverage ratio rules no. 266/2017.

The following tables show the NSFR and the LCR for the Group at the end of March 2021 and at year-end 2020.

<b>Net stable funding ratio</b>	31.3.2021	31.12.2020
For all currencies .....	119%	123%
Foreign currencies .....	182%	179%

<b>Liquidity coverage ratio</b>	31.3.2021	31.12.2020
For all currencies .....	172%	196%

\*Level 1 liquid assets include cash and balances with the Central Bank, domestic bonds and foreign government bonds in accordance with rules no. 266/2017 on liquidity ratio.

\*\*Short-term deposits with other banks with maturity less than 30 days.

### Deposits by liquidity coverage ratio category

The Group's deposits are categorised by counterparty according to the Liquidity Coverage Ratio (LCR) standard. The groups are listed in order of estimated stability and the respective LCR outflow weight. Deposits are also classified as stable if the customer has an established business relationship with the Bank and is covered by an effective insurance scheme.

## 52. Maturity analysis of assets and liabilities

The following tables show the maturity profile of the Group's financial assets and the undiscounted cash flows of its financial liabilities.

Maturity classification of assets is based on contractual maturity. For bonds and debt instruments in the banking book the maturity classification is based on contractual maturity while for bonds and debt instruments held for trading the maturity classification is based on the estimated liquidation time of the asset.

The tables show undiscounted contractual payments of principal and interest for the Group's financial liabilities. Thus, the total figures for each liability class are higher than the respective balance sheet amount. Cash flows for payments of unknown nature, such as for floating rate, CPI-linked or foreign currency denominated instruments, are based on internal yield curves and forecasts.

For dated financial liabilities the amounts are grouped into maturity buckets according to contractual maturities of principal and estimated contractual payments of interest. For demand deposits or other non-dated liabilities, the figures are grouped according to the first possible required payment date.

The following tables also show the contractual cash flow of the Group's derivative liabilities, i.e. derivatives that have a negative and a positive carrying amount at the reporting date. For derivatives settled on a gross basis, the cash flow for both legs of the derivative is shown, since netting cannot be applied upon settlement.

<b>At 31 March 2021</b>	Carrying amount	On demand	Up to 3 months	3-12 months	1-5 years	Over 5 years	No maturity	Total

#### Off-balance sheet liabilities

The following tables show the amount of contractual obligations of off-balance sheet liabilities that the Group has taken towards customers, either by committing to lend out money in the future or as third party guarantees. The amounts shown reflect the maximum amount, not taking into account the Group's ability to reduce overdraft or credit card limits before the current undrawn amount is fully utilised by the customer. These obligations all fall into the first time bucket since contractually, on a case-by-case basis, the Group could be required to fulfil these obligations instantaneously.

### 53. Market risk

The Group defines market risk as the current or prospective risk to earnings and capital arising from adverse movements in the level or volatility of prices of market instruments, such as those that arise from changes in interest rates, foreign exchange rates, equity prices, CPI-indexation and commodity prices. Sources of market risk are imbalances in the Group's balance sheet and open positions in bonds, currencies and equities. Derivative contracts are also potential sources of market risk.

Market risk within the Group can broadly be split into two categories, trading book and banking book. The trading book includes market risk exposures related, directly or indirectly, to the Group's short- and medium-term trading in securities, currencies and other capital market instruments and derivatives. All financial assets and liabilities in the trading portfolio are recognised at fair value and all resulting changes are immediately reflected in the income statement. The banking book includes market risk exposures related to securities held for long-term investment purposes, unlisted securities or holdings in subsidiaries or affiliates. A large part of the banking book market risk is due to mismatches in the composition of assets and liabilities, for example with respect to currencies, interest rates, CPI-indexation or other factors that can affect the Group's earnings or earnings volatility. These mismatches are reported to management and are subject to internal and regulatory limits.

### 54. Interest rate risk

Interest rate risk is defined as the current or prospective risk to earnings or capital arising from adverse movements in interest rates. Sensitivity measures like Basis Point Value (BPV) are used to measure and manage risk arising from its fixed income exposures. The BPV measures the effect of a 0.01 percentage point upward parallel shift in the yield curve on the fair value of these exposures.

## Notes to the Condensed Consolidated Interim Financial Statements

### 54. Cont'd

#### Interest rate risk in the trading book

The fixed income trading unit invests mainly in government bonds, bonds issued by the Housing and Construction Authority which are guaranteed by the Icelandic Government, domestic municipality bonds, and covered bonds issued by other Icelandic banks. Bonds and bills in the Group's liquidity portfolio are also categorised in the trading book. In the following table the total market value (MV) of long and short positions may not be the same as reported in Note 16 since netting between short and long positions is not applied here.

	31.3.2021			31.12.2020

#### Interest rate risk in the banking book

Interest rate risk in the banking book arises from the Group's core banking activities. The main source of this type of interest rate risk is the risk of loss from fluctuations in future cash flows or fair value of financial instruments as interest rates change over time, reflecting the fact that the Group's assets and liabilities are of different maturities and are priced relative to different interest rates.

The following table shows the interest sensitivity of the Group's banking book from a parallel 100 basis points change in all yield curves, with all other variables held constant, categorised by the date of next interest rate reset.

### 55. Currency risk

Currency risk is the risk that earnings or capital may be negatively affected from the fluctuations of foreign exchange rates, due to transactions in foreign currencies or due to a mismatch in the currency composition of assets or liabilities.

The analysis of the Group's foreign currency exposure presented below is based on the contractual currency of the underlying balance sheet items. Additionally, there are off-balance sheet items that carry currency risk and are included in the total currency imbalance. The off-balance sheet amounts below represent the notional amounts of derivatives and unsettled spot agreements.

Series C preferred shares in Visa Inc., which the Group holds, are included in the currency imbalance even though the shares are classified as held for sale.

# Notes to the Condensed Consolidated Interim Financial Statements

## 56. Inflation risk

The Group is exposed to inflation risk since the value of CPI-linked assets exceeds CPI-linked liabilities. The value of these assets and liabilities changes according to changes in the CPI at any given time and all changes in the CPI affect profit and loss. A 1% increase in the index would lead to an ISK 251 million increase in the balance sheet and a 1% decrease would lead to a corresponding decrease, other risk factors held constant.

	31.3.2021	31.12.2020
Bonds and debt instruments .....	4,927	4,684
Loans to customers .....	264,165	268,062
<b>Total CPI-linked assets</b>	<b>269,092</b>	<b>272,746</b>
Deposits from customers .....	92,404	90,353
Debt issued and other borrowed funds .....	135,527	136,487
Off-balance sheet exposures .....	16,025	19,725
<b>Total CPI-linked liabilities</b>	<b>243,956</b>	<b>246,565</b>
<b>CPI imbalance</b>	<b>25,136</b>	<b>26,181</b>

## 57. Derivatives

The Group uses derivatives to hedge currency exposure, interest rate risk in the banking book as well as inflation risk. However, the Group is subject to indirect exposure through customers' margin trading. Margin trading is subject to continuous monitoring and collateral requirements. Other derivatives held for trading or for other purposes are insignificant.

## 58. Capital management

The following tables show the capital base, the risk exposure amount, the resulting capital ratios, and the leverage ratio for the Group at 31 March 2021 and 31 December 2020.

The Group's regulatory capital requirement is calculated according to CRD IV as implemented through Act no. 161/2002 on Financial Undertakings and regulation no. 233/2017 on prudential requirements for financial undertakings. Capital requirement calculations for credit risk and market risk are based on the standardised approach whereas the capital requirement calculations for operational risk are based on the basic indicator approach.

EU regulation no. 2017/2395 regarding transitional arrangements for mitigating the impact of the introduction of IFRS 9 on own funds, was ratified into Icelandic law in May 2020. The regulation allows for the phasing in of capital impacts due to IFRS 9, allowing institutions to include a predefined level of provisions as part of CET1 capital. Íslandsbanki has elected to make use of the transitional arrangements, which will add ISK 3.8 billion to CET1, corresponding to an increase of 40 basis points in the Group's capital ratio.

The Group aims at managing its capital position and the corresponding capital ratios above the overall regulatory capital requirement. According to the latest SREP report from the Financial Supervisory Authority of the Central Bank, applicable as of 22 September 2020, the overall capital requirement is 17.0%. The Group's capital target includes a 0.5-2.0% management buffer on top of the overall capital requirement.

The minimum leverage ratio for Icelandic financial institutions is 3%.
